

Our Services - Jacking & Sliding

For situations where conventional handling of equipment such as cranes cannot be used, Crane Com provides reliable end to end Jacking & Sliding solutions, ensuring the highest level of work safety and precision.

Crane Coms Jacking & Sliding division have dedicated teams specialising in projects that require overweight and over-dimensional cargoes to be shifted or placed on foundations or in positions with the utmost accuracy. We have the capacity to shift and place heavy equipment of up to 1000 tons.

« **Experienced & certified riggers**

« **8 ton crane truck with certified operators**

« **Synchronised hydraulic jack systems with push /pull cylinders**

« **Rail grab & Steel / Teflon slides**

« **Certified slings, chains and shackles to complete the most technical operators**

« **Project managers**

This range of equipment, together with our highly skilled rigging teams, enable Crane Com to provide a high level of service on projects requiring lifting, lowering, horizontal jacking and sliding of heavy structures.
